- Portuguese conversational

Experience

City Science Coordinator

Norman Foster Institute | Madrid June 2023 – Present

As part of the in-house staff of the Master in Sustainable Cities, my main responsibilities include the co-creation of the Urban Analytics lesson and the development of the *City Pulse* -a multi-user app for diagnosing sustainability targets.

- Maintining client relationships with 3 city administrations : Athens, Bilbao and San Marino. Consultancy model to deliver actionable projects.
- Co-creation of 16-week GIS course and subsequent lab support for 24 scholars. From Open source softwares (QGIS, PostGIS), through Python based notebooks to user friendly web-apps

Data Consultant

Freelance, Multiple Clients | World 2021 – Present

Providing data collection, pre-processing, exploratory analysis and modelling services to clients (Private and NGOs) in their R&D stages of developing data driven products. Projects include:

- **Article 19 Global Expression Report:** internal transformation of a proprietary index report into a digital product that embraces modern data management and delivery. Currently with over 500K views in embedded [website](#).
- **Accesnture & JLR** : daily database updates with 120+ country wide post-sales managers. Optimising pipelines for Tableau dashboards with dynamic views based on custom profiles; delivery to emails.
- **ACASA** : asseses their current pipelines and to create a pipeline for a *spatially-aware* pricing index for faster response to clients and new business avenues. Reduced initial delivery times 7 fold (from weekly to less than 1hour)

Spatial Intelligence Lead

SENSE | London Nov 2018 – May 2022

Main responsibilities included the translation of business goals into innovative metrics for clients. Create the unit of data analysis that delivers the business's unique selling point - *USP*.

- Interpret and deliver domain expertise in the Architectural, Design, and Construction (AEC) industry to the internal technical team.
- Create a pipeline of future feature developments based on sophisticated data modeling techniques.

Urban Consultant

Space Syntax Lmtd | London Sept 2016 – Oct 2018

Advise and support of local authorities and large-scale private developers of the urban environments in London, China, and Kazakhstan.

- Create models for assessing new layouts with measures of urban centrality and connectivity.
- Recreate internal GIS processes for faster and more accurate delivery of reports.
